Username:test Password:test Upload Images and Files with your order in Virtuemart - VMUpload is a versatile plugin to the core application Virtuemart that allows for a customer to upload files to their order based on parameters established by the site administrator. it include a Joomla component and a Virtuemart patch.

Attention: if you are useing a custom vm theme, you need to choose the "custom" in the vm attribute selector, and pay extra 30usd for the custom vm patch work for you,after you purchase vmupload, please also send me the custom theme pacakge to the email here : joomvm@gmail.com, I will send back you the new patch for you asap.

- Upload and bind the files to a order
- Ability to add more upload fields as needed
- Secure client folder created as upload destination (folder name defined by username)
- Create the thumbnail image automatically if the uploaded file is picture
- Integrate with an image gallery for photos, show upload picture with lightbox
- CSS friendly coding; Multi-language compatible (English native)

- Check the uploaded files based on client orders
- Download uploaded files from orders
- Config number of maximum Files to upload
- Config Maximum files size
- Config upload file folder
- Choice of acceptable file types
- Creation of thumbnail image to defined size
- Manage the uploaded files

- There are three zip files, "com_VMUpload.zip" is the Joomla component,
- "VMPatch(for Virtuemart 1.1.1).zip" and "VMPatch(for Virtuemart 1.1.3).zip" are the Virtuemart Patch.

- Install the com_VMUpload.zip as a standard Joomla component.

- check your virtuemart version at first,
- we strongly advise you to update your virtuemart to the latest stable version(VirtueMart 1.1.3 is the latest stable version available now),
- if you get the version 1.1.1 or 1.1.3, you can use the patch in our package: VMPatch(for Virtuemart 1.1.1).zip,VMPatch(for Virtuemart 1.1.3).zip,
- go to the virtuemart's back end,and use virtuemart->admin->Check for Updates->Upload a Patch,
- then you can select the right Patch file and finish the installation.
- if you are using a lower version of virtuemart and can't update them to the latest version
- ,or there are some customizing in your virtuemart, you can contact me,
- I will make a right version for your application ASAP.
