VMupload Palette module

\$100.00

the module is designed for virtuemart upload component - vmupload, you can use vmupload to upload the files that you want in the checkout steps of virtuemart, it's popular in the online print website where you can provide the print service, the clients can upload the image that they want to print in those website. in some case, clients want to edit some text or cover some icon or small image in the background image, then my design module for vmupload be created.

the following is the module's feature :

we allow the client:

- upload an object(one picture)
- drag the object into the background image
- change the position and angle of the object in the design panel
- add texts - Change the text color
- Change the size of the object

type=image,width=31.75,height=30.691666666666666
90.00 0 0 87.00 28.35 470.99 cm /12 Do Q

The client must see the product before buying.

- A photo on a mug
- A photo on a puzzle
- A photo on a T shirt
- A photo on a plate
- A photo on an object etc. ...

the product is a customized service , you need to purchase the vmupload at first, then I will check your website, then give you a final price on the service.

the module is coded by Flash technic and Php, you can check the demo video here
